

A dendrogram illustrating the hierarchical clustering of GSVAs into neuron clusters. The title "GSVA Neuron Cluster" is centered at the top. The dendrogram shows a primary split into two main branches. The left branch further divides into two sub-clusters, each containing three individual GSVAs. The right branch divides into two sub-clusters: one containing two GSVAs and another containing three GSVAs. The GSVAs are represented by vertical bars at the bottom, with their relative heights indicating their distance from the root of the cluster.
